Abstract

Xi Jinping's Thoughts on socialism with Chinese characteristics in the new era is a scientific theory that conforms to the trend of the times and development trends. The thoughts pay more attention to the ideological and political education of colleges, because the study atmosphere construction is the key to cultivate outstanding talent in colleges. This article adopted literature research method, questionnaire survey method and summary induction method to study deeply of the rich connotation of Xi Jinping's Thoughts. Furthermore, this article analyzed the problems that why the study atmosphere in colleges was poor and explained the reasons for it. Finally, the article put forward suggestions to strengthen and improve the study atmosphere construction of college students.

Keywords

Xi Jinping's Thoughts; study atmosphere construction.

1. Introduction

Facing the "unprecedented changes" in the world, the key to make the Chinese dream of the great renaissance depends on talents. To cultivate high-quality talents, the study atmosphere construction is significant. The study atmosphere construction is the soul of a university. It is not only affects the effectiveness of ideological and political education, but also affects the growth and success of students. It is also the call of the era to build a strong country with talents. We should attach importance to the role of study atmosphere construction in college education and social development.

The 19th National Congress of the Communist Party of China was successfully held. The Communist Party of China, with Comrade Xi Jinping as the core, they were taking emancipating the mind, seeking truth from facts, keeping pace with the times and being practical as the practice standard, and then established Xi Jinping's Thought of socialism with Chinese characteristics in the new era. It is a scientific theory that conforms to the trend of the times and development trends. Norodom Ranariddh, the chairman of Cambodia FUNCINPEC Party, believes that the significance of Xi Jinping's Thought is extraordinary, which will have an important impact on socialism in the world and the whole human society [1].

Xi Jinping's Thoughts on socialism with Chinese characteristics in the new era had opened up a new realm of governance and administration, a new realm of socialism with Chinese characteristics and a new realm of Marxism [2]. It had rich connotations, such as economy, politics, culture, education, etc. In the report of the 19th National Congress of the Communist Party of China, comrade Xi Jinping pointed out that education was the basic project for the great rejuvenation of the Chinese nation. We should give priority to the development of education, strengthen the construction of teachers' morality and atmosphere, cultivate high-quality teachers, strengthen the ideological and political education of young students, and realize the

connotative development of higher education. And it was profoundly expounds a series of major theoretical and practical problems for promoting the study atmosphere construction in college. At the National Conference on ideological and political work in Colleges held in December 2016, Xi Jinping stressed that we should continue to cultivate excellent school spirit and atmosphere of study, so as to ensure the development of colleges was well managed [3].

Construction of study atmosphere is the core of high-quality talent training in universities. A good study atmosphere has many benefits. First, it can create a good study atmosphere for college students. Second, it can promote the growth and development of college students. Third, it will improve the quality of talent training in colleges. As a result, it promotes the talent power strategy [4-6]. Although the college study atmosphere is generally good, there are still many problems to be solved. Liu Xu fang, Yao Hui, etc. [7-8] found through a large number of questionnaires, the results showed that students were absent from class, late and leave early, cheating in exams and playing with mobile phones in class. And more than half of the students were lack of initiative in learning. They had a strong sense of utility. Liu Yi [9] pointed out that, at present, the purpose of students' learning is not clear and the utilization rate of spare time was low. Some scholars had also made suggestions on strengthening the construction of study atmosphere. Li Yufei [10] proposed in the "Rethinking the Construction of Atmosphere of Study for College Students", that the atmosphere of study should be carried out on the principle of student-oriented, teacher-led, and duct integration. Tan Zhenya [11] emphasized to enhance the connotation of campus culture and update the modern education concept.

It is worth mentioning the researcher that whose name is Baoquan Zhao. He wrote a paper named Xi Jinping's exposition on the relationship between study atmosphere construction and ideological education in colleges. He studied the important exposition of Xi Jinping on higher education with new perspective. That paper expounded the internal logic between the study atmosphere construction and the ideological education in colleges. At the same time, he put forward the suggestions on how to promote the construction of atmosphere study in colleges. Moreover, Yan Shuqun [13] summarized the important exposition of Xi Jinping's about the study atmosphere construction, he stated the relationship between Xi Jinping's Thoughts on socialism with Chinese characteristics in the new era and the study atmosphere construction of college.

Through those literatures, we found that, many of the researchers studied the reasons and measures on how to strengthen the construction of study atmosphere, they did not combine the Xi Jinping Jinping's Thoughts on the study atmosphere construction. Xi Jinping's Thoughts on socialism with Chinese characteristics in the new era is the leading core of China's ideological and political education, and it has great strategic significance for guiding the study atmosphere construction. The Thoughts bring new opportunities and new topics to the study atmosphere construction. The development of this topic will not only help us to understand the scientific connotation and spiritual essence of Xi Jinping's Thoughts on socialism with Chinese characteristics in the new era, but also have a very important academic value and practical significance in exploring and enhancing the effectiveness of the study atmosphere construction.

2. The Rich Connotation of Xi Jinping's Thoughts on Socialism with Chinese Characteristics in the New Era

Xi Jinping's Thoughts on socialism with Chinese characteristics in the new era is a systematic and logical scientific theory system with rich ideological connotation. Based on the combination of theory and practice, the Thoughts have systematically answered the questions about what kind of socialism with Chinese characteristics to adhere to. Its spiritual essence and rich connotation are concentrated in the "eight clear" basic connotations and the "four adherences" basic strategy. They are integrated with each other and organically unified, to forming the Xi

Jinping's ideological system on socialism with Chinese characteristics in the new era. They condensed our party's experience of developing socialism with Chinese characteristics.

3. Xi Jinping's Thoughts on Socialism with Chinese Characteristics in The New Era Leads the Study Atmosphere Construction

Youth flourishes the country. College students are the hope and future of our nation. The study atmosphere construction is related to help students establish the correct world outlook, the values and the life outlook. It is also related to the development of the socialist cause with Chinese characteristics. At present, Xi Jinping's Thoughts on socialist with Chinese characteristics in the new era is a theoretical guide and practical guide for the study atmosphere construction. They make higher education more purposeful. Cultivating virtues and talents are the final destination. We hope to reform and innovation the work of study atmosphere construction. So that we could make a deep understanding in the Xi Jinping's Thoughts. There are three reasons to explain that. First of all, Xi Jinping's Thoughts will help to promote and improve the system in the right direction. Secondly, Xi Jinping's Thoughts will help to guide the path choice and promote the emotional identity of study atmosphere construction. Thirdly, under the guidance of Xi Jinping's thought, we will continue to creating the ideas in study atmosphere construction and leading it to a higher level.

4. Analyze the Current Situation and Reasons of Study Atmosphere Construction

4.1. Students Are Very Utilitarian in Their Study

Under the situation of economic globalization, various ideas and cultural thoughts collide with each other, and that will make a profound impact on the world outlook, outlook on life and values of college students. They are lacking of the study objectives and have no great ideals. They study for the only goal is to get scholarships or get a high-paying job when they are employed. There are few students who really want to serve their country through study. Students' learning objectives are strongly utilitarian. We are very worried about the consequences of this phenomenon. No one studies to achieve great dreams from the bottom his/her heart. Weakening of the ideological and political education, there is no good learning atmosphere and positive learning atmosphere, which will seriously affect the study atmosphere construction.

4.2. Students Are Less Interested in Learning

Learning interest is the intrinsic motivation for learners to carry out learning activities. While in the new media environment, students' spare time is occupied by various mobile games or computer games. Furthermore, students also spend a lot of time browsing entertainment news, drama, etc. More than half of the students will not take the initiative to study in the library. On the other hand, under the environment of knowledge explosion, the lectures from teachers are boring and dull. The teaching style is not attractive, and the professionalism is declining. So it results in a poor learning atmosphere and students are not interested in learning.

4.3. Students Do Not Observe Learning Discipline

Students in college are usually late for class, leaving early, cutting school, sleeping and playing mobile phone. When approaching the exam, students always ask the teacher to pointing out the key points, arranging the answers or even cheating in exams. When students do their graduation thesis, they only play at this work or even plagiarize. Academic style is the most real response of the college. There are three main reasons for the indiscipline of college students. First, the system of study style construction is not perfect. Second, teachers and counselors are

lacking of management methods. Finally, students do not have a strong sense of self-management. Study style construction becomes more difficult.

5. Countermeasures and Suggestions for Study Style Construction

Establishing a good learning environment is the key to cultivating high quality talents. The core of study style construction is to correct the learning attitude and motivation of college students. It has to be said that this is a long-term and systematic project. We should use Xi Jinping's Thoughts as a guide to strengthen the education of ideals and beliefs, improve the career education and carry out the academic education.

We should also improve the mechanism and system to make the teaching management system more strict and standardized. From the perspective of management team, we should improve the teachers' morality and teaching ability. Moreover, campus culture is an important way to strengthen the study style construction. For example, give play to the role of student party members and carry out healthy campus cultural activities.

In short, we should improve the current academic style from multiple angles and ways. We should also improve the quality of academic style in universities, so as to cultivate high-quality talents for the country.
